Farmers And Families First Releases Statement Thanking President Trump and Congress for 2018 Farm Bill Passage

Washington D.C. – Farmers and Families First today released the following statement after President Trump signed the 2018 Farm Bill:

“We thank President Trump and members of Congress for their overwhelming, bipartisan passage of the 2018 Farm Bill. This bill is an important victory for farmers, ranchers and rural families. With President Trump’s signature, Washington has delivered economic certainty to struggling farm communities helping them grow their crops and incomes.

“The need for the 2018 Farm Bill has only heightened these past few months, as evidenced by the devastating wildfires and hurricanes that’ve wreaked havoc on American farmlands, as well as harmful tariffs that’s left many Americans uncertain about their economic future.

“This critical piece of legislation leaves rural communities better positioned to weather these storms and move America forward. We applaud Republicans and Democrats for voting to maintain America’s agriculture dominance and to grow middle-class families’ pocketbooks.”
